

TrustBio, a leader in molecular diagnostics, is thrilled to announce its participation at MEDICA 2023, the world's largest medical trade fair. We cordially invite our valued customers, partners, and friends to visit our booth and discover the groundbreaking EZCheck Microfluidic Nucleic Acid Testing System.

The EZCheck system combines two proprietary technologies: microfluidic engineering and eLAMP nucleic acid amplification. Designed to address current pain points in nucleic acid testing, including lengthy turnaround times, high costs, bulky equipment, and the need for highly trained professionals, EZCheck has set new industry standards.

The features of the EZCheck system:

**Speed and Efficiency:** Witness nucleic acid testing like never before. EZCheck delivers results in just 15 minutes, streamlining diagnosis and decision-making processes.

**Multiplex Testing Capability:** EZCheck can simultaneously detect up to six targets, enabling comprehensive testing in a single run. This level of multiplexing is unparalleled in the industry.

**User-Friendly:** EZCheck is remarkably easy to operate, reducing the reliance on highly specialized personnel. The system's intuitive design simplifies the testing process.

**Portability:** With its compact form factor, EZCheck is a portable solution, eliminating the need for extensive laboratory equipment. It's the ideal tool for point-of-care testing.

**Precision and Sensitivity:** The system maintains a high level of specificity and sensitivity, ensuring accurate results even with challenging samples.

**Cost-Effective:** TrustBio is committed to providing cost-effective solutions without compromising quality. EZCheck's competitive pricing makes advanced nucleic acid testing accessible to all.

Would like to understand more about EZCheck system? Our team of experts will be on-site to provide hands-on demonstrations and answer your questions.

**Booth Number: Hall 1 B70**

**Date: Nov. 13-16, 2013**

**Location: Messe Düsseldorf, Düsseldorf, Germany**
